DESCRIPTORS Adult Education: *Career Education; Elementary

Grades: *Estimated Costs; Junior High Schools: Middle Schools: Models: Operating Expenses: *Program Costs:

Secondary Grades: Vocational Education

ABSTRACT

This model provides guidelines for estimating the costs which will be incurred in the implementation of a career education program at all grade levels. The estimation of annual costs is outlined for programs in the areas of teacher inservice training, dropout prevention, counseling, career exploration (required and elective), and vocational education. The areas of adult education, career education, and job placement services are discussed. Costs for additional central office supervisory staff and a schedule for implementation of recommended programs are also touched on. (BP)

Adult Education

| Since all vocational programs now in are to be transferred to |
|--|
| the Career and Skill Development Center, it is recommended that the building |
| be converted for use as the Adult Education Center of the School |
| Board. In addition to providing space for such adult continuing education |
| programs as supervisory training programs, sales training programs and others |
| now offered by the school syste., Adult Basic Education programs would be |
| offered. The many adults in need of basic education would be more willing to |
| enroll in such courses if they are offered in an Adult Education Center such |
| as recommended herein, than if they had to go to buildings used for elementary |
| and/or secondary students. |

Plans for the programs to be offered in the Adult Education Center are to be developed in close cooperation with industry, professions, business, labor and community representatives serving on an advisory committee, with officials of _______ Junior College, since the _______ School Board has no intention of offering post-secondary school programs. It is possible that the building might be jointly used by ______ and the Board.

No estimate of costs or program offerings is included until recommendations are forthcoming from the above-appointed cummittee.

Notes:

| 1. | Vocationa! exploratory and skill development programs in the high schools |
|----|---|
| | as planned for in this report will accommodate students as compared |
| | to the approximate now being accommodated. |
| 2. | All Industrial Arts and Trade and Industry shops in the high schools will |
| | be discontinued, and space will be converted for use by the World of Work |
| | programs outlined above. |
| 3 | Trade and Industry and Industrial Arts teacher certification requirements |
| | need to be reformed by the State Department of Education. |
| 4. | Arrangements will be made with parochial schools to admit approximately |
| | tostudents in the several Career Center programs outlined above. |

Division of Career Education and Job Placement Services

This new Division and its field staff will have primary responsibility for involving the community, business, industry, and professional resources and people in the task of enriching the school programs and in making Career Education a reality. Organizationally, its Director will report directly to the Deputy Superintendent or Assistant Superintendent for Curriculum.

Activities will include supportive services to teachers such as arranging for class visits to offices, plants, etc.—including arrangements for transportation obtaining industry, etc., speakers for schools and classes; helping organize advisory committees and providing staff services to the committees developing, publishing, and distributing special Career Education information news, ideas, etc., including available audio-visual and other instructional information.

This Division will have the responsibility for helping obtain part-time and summer employment for youth while in school and full-time employment for students leaving school, including establishment of records and follow-up programs. The Division will work closely with the Distributive Education, Business Education and other work-study and cooperative education coordinators in obtaining employment opportunities.

At the Central Office level, the Division will be responsible for developing and maintaining relationships with various community-wide organizations, such as the Employment Service and other government and private agencies concerned with education and human resources development. The Division will also provide or arrange for provision of staff services to industry-education advisory committees established in cooperation with the Metropolitan Area Committee and assist contral office subject matter and program supervisors in achieving close working relationships with their committees.

The Division will also pursue an active program to obtain summer employment for those teachers seeking industry and business experience related to their instructional programs.

| Aditional Central Office Supervisory Staff | | |
| TOTAL | \$ | \$ |

Schedule for Implementation of Recommended Program

| It is recommended that this report be implemented over a period of |
|---|
| three years. This plan would then roughly call for an expenditure of |
| approximately million dollars per year for three years for buildings |
| and equipment. Note: No estimates are included for Special Education and |
| Adult Education programs. These estimates are to be included as soon as |
| appropriate studies are completed. |
| The estimated for annual operating expenses is based on costs |
| at such time as the entire recommended program becomes operational. At this |
| moment in time, it is not possible to estimate annual operating costs until |
| the program is fully operational, but initial "start-up" activities will requir |
| employment of needed supervisory staff for planning purposes, appointment of |
| advisory committees, and conduct of basic workshop training programs. Following |
| is the estimated cost for the first year's activities, recommended for initia- |
| tion in September, 1973: |
| Director of Career Education and Job-Placement Services, Assistant Director and One Secretary \$ 35,000 |
| Additional Central Office Supervisory Staff and Secretaries |
| Teacher In-Service Career Education Training Programs |
| Dropout Prevention Educational Services |
| Pupil Services Advisors (Counseling) and Computer-Based Guidance Information System (Leap Frog) |
| |

Ċ

It should be noted that these are basically salary and training program expenditures which will remain constant each year, except for additional personnel in the Divston of Career Education and Job Placement Services, and Central Office Supervisory staff.

Unless all or a substantial portion of the above-recommended funds are budgeted, it is suggested that supervisory staff and teachers not be asked to engage in any in-depth planning for implementing Career Education concepts, philosophies and practices except to enrich their instructional programs with "people-job" content as they may engage in Think Careers exercises in regular staff meetings with their subject matter and other supervisory staff. We believe that such exercises can help introduce Career Education into class-rooms, shops and laboratories in the schools and help enrich instructional programs at all grades and grade levels.
